Portfolio: yaseensamad.github.io/yaseen-mohamed-portfolio

Professional Summary

Full Stack Developer with 4 years of experience building and supporting production web applications across healthcare, workflow automation, travel, and enterprise domains. Strong experience with Angular, React, JavaScript, Python, FastAPI, Node.js, PostgreSQL, MySQL, and REST APIs. Experienced in end-to-end application development, third-party integrations, AWS deployment, production troubleshooting, and open-source software development. Hands-on experience with AI agent orchestration, MCP, LangGraph, and AI-driven application workflows. Comfortable working in Agile/Scrum teams, using Jira for sprint and task tracking, Git and GitHub for version control, and Postman for API testing. Proven ability to independently own features and proof-of-concept projects, collaborate with stakeholders, and deliver maintainable and scalable software solutions.

Professional Competencies

- Software Engineering:** Full Stack Development, Object-Oriented Programming, API Design, System Integration, Debugging, Refactoring, Code Quality
- Backend Engineering:** Python, FastAPI, Node.js, REST APIs, GraphQL, Authentication, Validation, Error Handling
- Frontend Engineering:** Angular, React, TypeScript, JavaScript, Angular Material, Responsive UI, Form.io
- AI Engineering:** AI Agent Orchestration, LangGraph, MCP, LLM Applications, AI Workflow Automation, Multi-Agent Systems
- Cloud and DevOps:** AWS EC2, S3, RDS, CloudFront, Route 53, VPC, Docker, Docker Compose, Nginx, CI/CD
- Integration Engineering:** Third-Party APIs, FHIR, Stripe, Twilio, SendGrid, Google Drive, Salesforce, Slack, Keycloak
- Agile Delivery:** Agile, Scrum, Sprint Planning, Jira, Backlog Grooming, Cross-Functional Collaboration
- Engineering Practices:** Unit Testing, Integration Testing, Production Support, Performance Optimization, Technical Troubleshooting, Mentoring and Technical Guidance

Technical Skills

- Languages:** Python, JavaScript, TypeScript, C, C++, HTML, CSS
- Frontend:** Angular, React, Angular Material, Form.io
- Backend:** FastAPI, Node.js, Express.js
- APIs:** REST, GraphQL, gRPC, MCP
- Databases:** PostgreSQL, MySQL, MongoDB, Redis, immudb
- AI / LLM:** LangGraph, LangChain, MCP, Agent Orchestration, RAG, Multi-Agent Systems, Claude (Anthropic), Gemini, OpenAI, Grok
- Cloud / DevOps:** AWS EC2, S3, RDS, CloudFront, Route 53, VPC, Docker, Docker Compose, Nginx, GitHub Actions
- Security / Identity:** Keycloak, Authentication, Authorization
- Version Control and Collaboration:** Git, GitHub, Slack
- Project Management / Agile Tools:** Jira, Scrum, Agile, Postman
- Design Collaboration:** Figma
- Other Tools:** Camunda, MJML

Professional Experience

AOT Technologies	Aug 2022 - Present
Software Engineer II	Jan 2025 - Present

Quipo - Healthcare Management Platform

- Independently handled end-to-end development of multiple healthcare application modules using Angular, Node.js, FastAPI, and PostgreSQL.
- Developed scalable frontend modules using Angular and Angular Material and implemented backend APIs and services using Node.js and FastAPI.
- Integrated third-party services including Twilio, Stripe, and SendGrid to support communication, payment, and notification workflows.
- Implemented features including appointment booking, invoice management, Mapbox integration, and internationalization (i18n).
- Improved application security through email security enforcement and backend security middleware.
- Provided production support, investigated application issues, and implemented fixes to improve system stability and reliability.
- Used Jira for sprint planning and task tracking, and Postman for API testing and validation within an Agile/Scrum delivery process.

Node Wire - Open-Source Connector Integration Platform

- Contributed to the development of an open-source Python/FastAPI platform for building and executing connector adapters for services including Google Drive, SMTP, Stripe, FHIR, Salesforce, and Slack.
- Worked with REST, gRPC, and MCP interfaces to expose connector capabilities through a consistent execution contract.
- Contributed to connector testing, validation, error handling, and reliability improvements across integration workflows.
- Participated in open-source licensing activities, testing, documentation, and project preparation for public release.
- Used GitHub for version control, code reviews, and collaborative development.

formsflow-EPIC - Healthcare EHR Integration POC (Completed)

- Independently developed a Proof of Concept (POC) integrating formsflow.ai, a form builder and workflow automation platform,

- with Epic, one of the most widely used Electronic Health Record (EHR) systems in the US.
- Designed and implemented backend integration services using Python and FastAPI for API-based healthcare data exchange between formsflow.ai and Epic EHR.
- Implemented key EHR workflows including Epic Consent, Patient Registration, and PHQ9-GAD7 behavioral health screening forms, along with an AI-powered Care Gap Finder feature to help identify gaps in patient care.
- Used immudb, an immutable database, to implement secure audit logging across the integration.
- Took end-to-end ownership of the POC, including technical design, implementation, API integration, testing, and troubleshooting, through to successful completion.

Foundry - Offline Forms Functionality (Current)

- Currently working independently on Foundry, implementing offline forms functionality within formsflow.ai so field workers can continue filling and submitting forms without reliable internet connectivity, taking full ownership of design, implementation, and testing.

Software Engineer I

Mar 2023 - Jan 2025

BC GolfSafaris - Travel and Tour Management Platform

- Developed and enhanced responsive frontend features using Angular and React, focusing on usability, performance, and maintainability.
- Contributed to backend services using Node.js and FastAPI and integrated frontend applications with REST APIs.
- Created dynamic email templates using MJML for automated customer communication.
- Collaborated with stakeholders to understand business requirements and translate them into technical solutions, working within an Agile/Scrum development process.

formsflow.ai - Form Automation and Workflow Platform

- Developed and enhanced dynamic form and workflow features using React, Form.io, and Camunda.
- Implemented business workflows supporting multi-level approvals and complex workflow automation scenarios.
- Improved application usability and performance through feature enhancements, optimization, and code refactoring.
- Collaborated with the development team to troubleshoot issues and deliver production-ready features, tracking work items in Jira.

Junior Software Engineer

Aug 2022 - Mar 2023

formsflow.ai - Form Automation and Workflow Platform

- Developed frontend features using React and Form.io for dynamic form-based applications, referencing Figma designs for UI implementation.
- Worked with Camunda workflow configurations to support business process automation.
- Fixed application defects and implemented UI enhancements while following established development practices.

Selected Projects

Human Resource Management System - Full-Stack Application

- Developed an HR management platform using Angular, Node.js, and MySQL for managing employee data and workflows.
- Deployed the backend on AWS EC2, frontend on Amazon S3, and database on Amazon RDS.
- Configured Amazon CloudFront for content delivery and Amazon Route 53 for domain and DNS management.
- Configured an AWS VPC with public and private network components to support the application infrastructure.
- Connected application components across the AWS infrastructure and configured the deployment environment for production-like usage.

Agentic Orchestrated Contrarian System - Hackathon

- Built an AI-powered multi-agent application using FastAPI and React as part of a Technopark Trivandrum hackathon.
- Implemented multi-agent orchestration and server-sent events (SSE) for real-time communication between the application and AI workflows.
- Integrated multiple LLM providers including Gemini, OpenAI, and Grok.
- Won **2nd Prize** in the Technopark Trivandrum Hackathon.

Education

Bachelor of Computer Applications (BCA), IGNOU

2023 - 2025

Result Awaited

Diploma in Computer Engineering, Kerala State Board of Technical Education

2019 - 2022

CGPA: 8.47

Higher Secondary (Plus Two), Computer Science

89%

SSLC

Full A+

Additional Information

Languages: English, Hindi, Malayalam

Location: Kerala, India

Professional Development

Anthropic Claude Partner Network (CPN) - In Progress

Coursework: Introduction to Agent Skills, Building with the Claude API, Introduction to Model Context Protocol (MCP), Claude Code in Action
